

administrative agency
dealer**Best**

Especialistas
en automoción

Our administrative agency which is specialized in operations in the automobile sector forms the fundamental pillar of **dealerBest**.

However, we are not only an agency. We also analyze and ask questions that may lead to a better knowledge for the client. It is all about adding value and converting a car dealer in an efficient one.

Our short-term target is integrating ourselves in the organization, replacing your usual providers. This is done, of course, with the least impact possible.

In the long term, the main target is to expand the organization by generating cross business and added value.

dealerBest is qualified for giving you an answer to your needs because of the following three reasons:

Successful model: Knowledge of the market and the players.

Reality: Knowledge of the client's needs and requirements.

Equipment: We count on the best technical resources.

1. Philosophy

We have been working **since 1988** as an administrative agency specialized in the automobile industry. After all these years we finally decided to change our activity by turning it 360° around. We started as "specialized messengers" and became professionals who add value to their clients.

Doing so, we know how to differentiate ourselves from our competitors, providing something different to such an important business area as the car and motorbike industry is.

Dealing with more than **50.000 vehicles** every year during the last 10 years provides us with in-depth experience which we generate for our clients, generating them benefits.

Regardless the volume, we work with every record as if it were a remarketing brand account. The result: Our average processing terms are very below the industry average.

In addition, we unite tools designed to serve car dealers all over the country and value operations such as: online agency manager which eliminates paperwork for the client, interacting possibility between the accountant departments and us, data exchange, custody and hosting of demo papers, local taxes establishment with administrative and legal support for new offices.
